Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/760,248	Applicant(s) SILVERBROOK, KIA	
	Examiner LAURA E. MARTIN	Art Unit 2853	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/19/09 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 - 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaneko (US 5592200).

Kaneko discloses the following claim limitations:

As per claim 1: a printing fluid storage; a pagewidth printhead (figure 3, element 1; column 6, lines 39-46) in fluid communication with the printing fluid storage (figure 3, element 13), the printhead having an array of inkjet nozzles formed on a nozzle substrate; and an air cover plate arranged along side (column 6, lines 54-64) the inkjet nozzles so as to contact, and thereby protect the inkjet nozzles from contact with paper (it would have been obvious to one of ordinary skill in the art at the time of the invention

Art Unit: 2853

that if the nozzles are capped, they cannot come into contact with the paper) for printing and so as to direct compressed air across the inkjet nozzles (column 3, lines 20-21; compressed air is directed across the nozzles during the suction process) upon insertion of the cartridge into a cradle of the ink jet printer.

As per claim 2: an elongate body housing the printing fluid storage and adapted to be received within the cradle of the inkjet printer (column 6, lines 39-46, a pagewidth printer has an elongate body for storing printer fluid therein).

As per claim 3: the air cover plate is arranged to connect with an air duct compressor of the cradle upon insertion of the printer cartridge therein (figure 3, element 4).

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.
